

Password Vault Manager

Centralize it
Secure it
Simplify IT!

Password Vault Manager is an all-in-one passwords and credentials management platform for your entire organization.

Centralize your bank and credit card information, software keys, email account credentials, alarm codes and many others and remember only one master password.

Improving help desk and user efficiency, while making passwords more secure.

Password Vault Manager Vision

Improving help desk and user efficiency, while making passwords more secure.

When IT pros are asked to share their most frequent help desk inquiry, they note that 25-40% of all inquiries deal with lost passwords or password resets. And when you consider that today's users need to remember dozens of passwords, it's not hard to see why.

However, allowing users to write passwords on a piece of paper, store passwords in unsafe spreadsheets or other document, or worst of all, use the same password for everything, are just not acceptable solutions.

Clearly, organizations need a smarter way to manage passwords – a way that also frees up IT pros and users to focus on important tasks, instead of searching for, or resetting, lost passwords. And that smarter way is Password Vault Manager (PVM).

Our flagship solution Remote Desktop Manager (RDM) delivers a simple and efficient solution to the problem of managing dozens - if not hundreds - of different remote connections and servers. With RDM, we answer the remote desktop and virtual machine management needs of IT pros at every organizational level: from CEOs, CTOs and other top executives, through to Sysadmins, network administrators, and specialized field personnel.

PVM incorporates everything we've learned from RDM, and at the same time, it fulfils our mission of delivering to top management the tools they need to centralize, secure and simplify IT. With PVM, we offer a proven password management solution throughout the entire organization.

We know our industry, we know our users, and we know the problems that keep IT pros up at night. PVM is simply the smarter way to manage passwords – period!

Password Vault Manager delivers

Intuitive

PVM features an intuitive UI, user-friendly operation, and a complete range of functions that make it easy and effective for all users, regardless of technical knowledge or background.

There's no need for extensive training and support, which is great news for end users, and even better news for busy IT pros and Sysadmins!

Secure

PVM empowers you to generate strong and unique passwords for all your accounts, which can then be centralized in a secure database and shared throughout the entire organization.

Plus, you can grant access to certain group of users – and keep others locked out.

By fortifying security around users and passwords, PVM helps you strengthen the entire network!

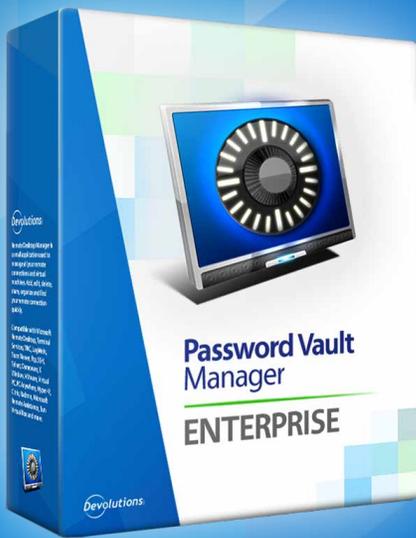

Productive

PVM is a practical and efficient tool that's designed for everyday use. It does more than just reduce help desk calls.

It also boosts productivity, because users won't have to remember or retrieve passwords anymore.

By increasing productivity and simplifying life, PVM reinvents the way people and organizations work with passwords!

Password and credential management solutions

More than 200,000 users all over the world rely on our products

- Reduce help-desk call by 25% to 40%
- Eliminate time loss on retrieving forgotten passwords and credentials
- Have access to database connection logs and reports for management purposes

- Enable teamwork and share session settings
- Manage user security accesses

- Increase network security with strong and unique passwords
- Strong random password generator
- U.S. federal government approved encryption
- Secure, organize and store your passwords into groups and folders

- No extensive training required
- Easy to deploy, easy to use
- Intuitive interface

Get started with Password Vault Manager in minutes!

Have you ever wished that you could easily and efficiently manage, organize and securely store your passwords? With Password Vault Manager (PVM), you can do it all in minutes!

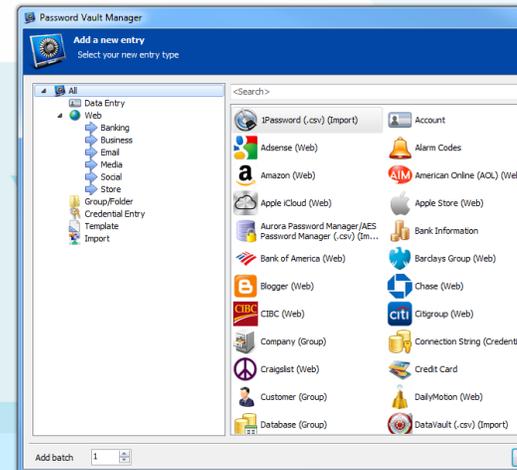

Here's how:

1. Download PVM

Download either the Standard or Enterprise version of PVM. The Enterprise version enables you to access all features, while the free Standard version offers limited functionality. Simply choose your preferred version, and follow the download instructions.

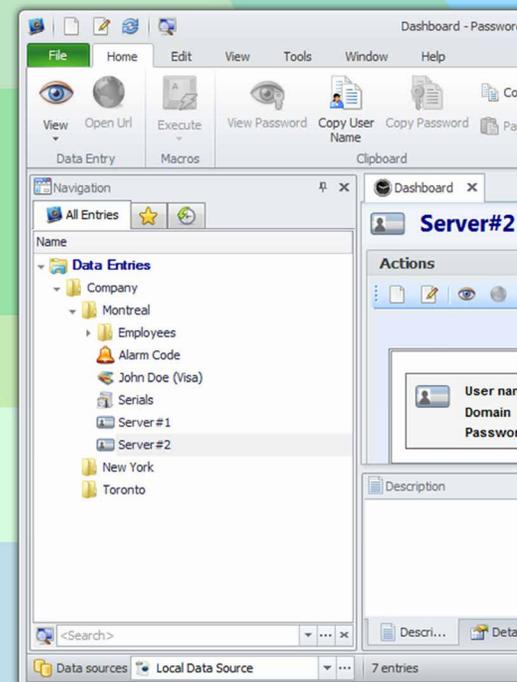

2. Create entries

Set different entries (username + password), software license keys, bank information, email accounts, website passwords, alarm codes, etc.

3. Start working

Congratulations, you're ready to easily and securely manage, organize and store all your passwords and credentials! You can now quickly find passwords, share information with your team, manage security rights and access, and centralize passwords in a secure, centralized repository for easy maintenance and updating.

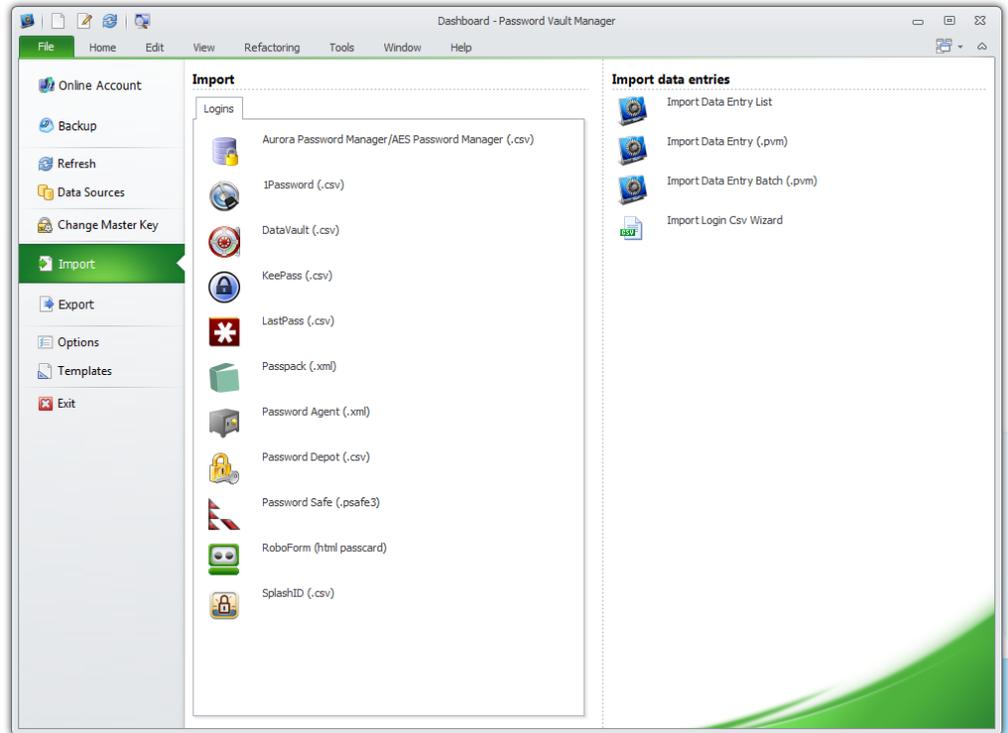

Support Multiple Entry Types

Import passwords into Password Vault Manager

We've developed Password Vault Manager (PVM) to integrate many of the different password management tools that you might already be using, such as KeePass, 1Password, LastPass, SplashID, Password Safe, and many others.

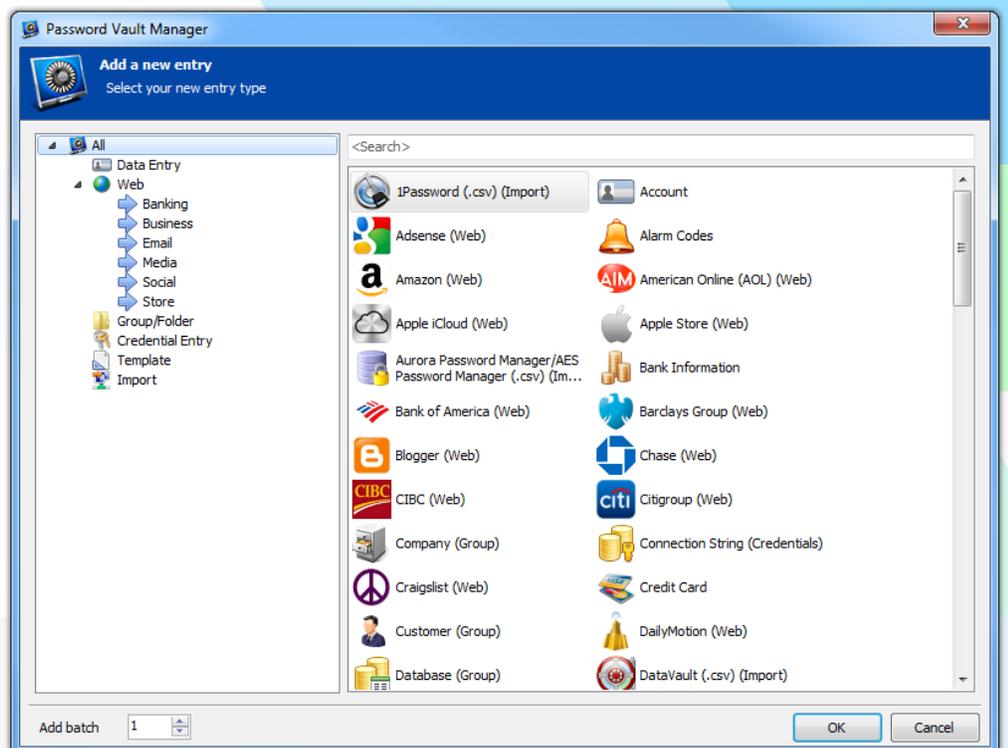

PVM is the elegantly efficient way to centralize all of your organization's passwords in one convenient, secure location!

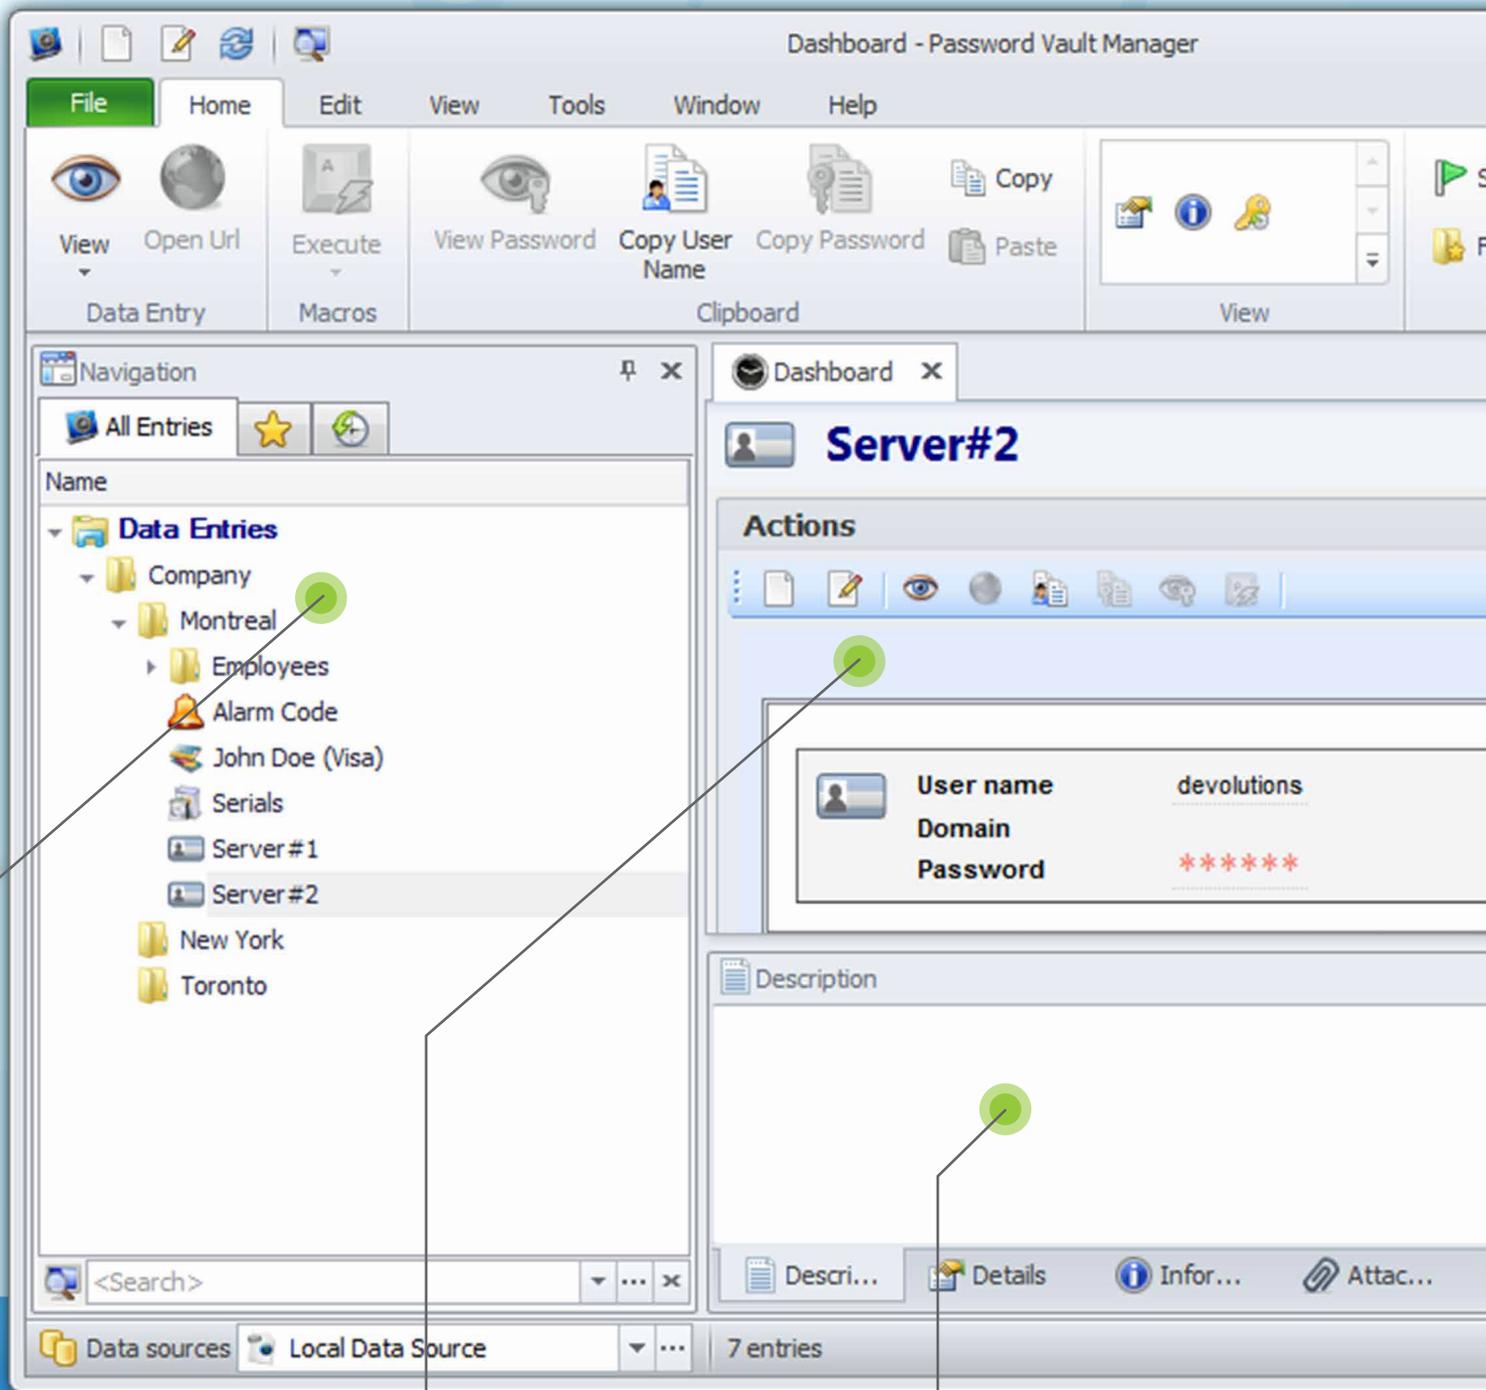

Count on us to create the entry you need.
No extra fees, no worries.

PVM supports more than 60 pre-configured account types, and the list grows every week. Our development team works day-in and day-out responding to requests from our amazing community of IT professionals.

Tell us what you need, and we'll make it happen!

A single, easy-to-use dashboard

• Group different entries

To simplify your life, Password Vault Manager lets you organize entries in groups (folders). You can then easily view all entries within selected groups and subgroups, and find a specific group(s) using the convenient search filter.

• Manage your settings

Use the PVM dashboard to create, edit, delete and manage all of your passwords and credentials. Simply create an entry and PVM takes care of the rest. Enjoy the freedom to select options and settings that meet your specific requirements.

• Securely share information

Easily add information, documents and sensitive data to any entry/entries, so that you can securely share information with your team and increase productivity. You can also manage each user's security rights and grant access to a specific group of users.

Licensing

Whether you work as a sole specialist or as part of a global team, there's a Password Vault Manager (PVM) license that's right for you.

All of the freedom you want

PVM licenses are available per USER -- not per machine. We've done this so that you can benefit from our product at home and in your office without paying additional licensing fees.

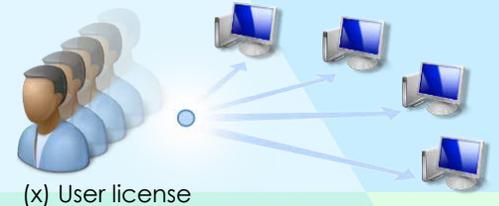

Plus, PVM is not a subscription-based service, and your license will never expire. You'll also receive one full year of upgrades and support at no additional cost.

After that, you can choose to pay a nominal fee and receive regular maintenance and upgrades, along with the capacity to install the latest PVM version(s).

Single user license

Multiple user license

Site license

Global license

Site license **vs** Global license

A site license grants you the right to use PVM for an unlimited number of employees/users for a single site/office.

A global license grants you the right to use PVM for an unlimited number of employees/users across multiple sites/offices, anywhere in the world.

Resources & Support

We have PVM answers when you need them! Plus, we simplify the support process by empowering you to choose the channel that's best for you:

Support team

Our world-class support and development team is always ready to help you! We don't just sell licenses; we create partnerships. And we don't just develop new technologies; we deliver concrete solutions. That's why our support team is always ready to answer your questions and respond to your requests.

Blog

Our blog serves a global community of IT pros and other users, and focuses on both technical and non-technical topics of interest. Our blog is also a great way to learn more about us, who we are, and what we do. You'll also find information on software updates, new tools, and tips and tricks to help you get the most of PVM's many enhanced features.

Forum

Our PVM forum is your one-stop source for PVM-related knowledge, technical information, expert-to-expert conversation, and more. With over 2,000 active members from across the globe, be assured that you'll be in exactly the right place to ask your questions, request new features, or tell us about an add-on or plugin that you'd like to see. We take all requests very seriously, and pride ourselves on being responsive to our community.

Tutorials

Explore our video tutorials that clearly explain PVM's key features. Learn how to setup new entries, share sessions, manage security groups, install add-ons, manage credentials, store passwords, and more. Plus, we're always adding new videos and updating existing ones to capture the latest features.

Online help

PVM online help is your 24/7 go-to resource for answers regarding various features, functions, integrated tools, protocols and much more.
